Summary Prospectus

March 30, 2019

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://smeadcap.com/smead-value-fund/>. You may also obtain this information at no cost by calling 877-807-4122. The Fund's prospectus and statement of additional information, both dated March 30, 2019, are incorporated by reference into this Summary Prospectus.

Beginning in March 2021 for the Fund, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the reports from the Fund like this one will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund or from your financial intermediary, such as a broker-dealer or bank. Instead, the reports will be made available on a website available on the Fund's website (<https://smeadcap.com/smead-value-fund/>), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you invest through a financial intermediary, you may elect to receive shareholder reports and other communications electronically from the Fund by contacting your financial intermediary (such as a broker-dealer or bank). If you invest directly with the Fund, you will receive shareholder reports electronically beginning in March 2021.

You may elect to receive all future shareholder reports in paper free of charge. You can request to continue receiving paper copies of your shareholder reports by contacting your financial intermediary or, if you invest directly with the Fund, calling 877-807-4122 to let the Fund know of your request. Your election to receive shareholder reports in paper will apply to all funds held with the Fund or through your financial intermediary.

Investment Objective. The investment objective of the Smead Value Fund (the "Fund") is long-term capital appreciation.

Fees and Expenses of the Fund. This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts on Class A shares if you or your family invest, or agree to invest in the future, at least \$25,000 in the Fund’s Class A shares. More information about these and other discounts and waivers is available from your financial professional and under “Shareholder Information – Class A Sales Charge Reductions and Waivers” beginning on page 18 of the Fund’s Statutory Prospectus, under “Exhibit A – Sales Charge Waivers” on page 38 of the Fund’s Statutory Prospectus and under “Additional Purchase and Redemption Information – Sales Charges on Class A Shares” beginning on page 35 of the Fund’s Statement of Additional Information (“SAI”).

-------	-------	-------	-------	-------	-------

- (1) The Maximum Deferred Sales Charge on Class A shares is applied only to purchases of \$1,000,000 or more that are redeemed within 18 months of purchase.
- (2) Smead Capital Management, Inc. (the "Adviser") has agreed to waive its fees and/or absorb expenses of the Fund to ensure that Total Annual Operating Expenses (excluding any taxes, leverage, interest, brokerage commissions, dividends and interest on short positions, acquired fund fees and expenses and extraordinary expenses such as litigation) do not exceed 1.26% for Investor Class shares, 1.26% for Class A shares, 0.99% for Class I1 shares, 1.59% for Class R1 shares, 1.44% for Class R2 shares and 0.84% for Class Y shares through March 31, 2020, subject thereafter to annual re-approval of the agreement by the Board of Trustees. Any waiver of management fees or payment of expenses made by the Adviser may be reimbursed by the Fund in subsequent years if the Adviser so requests. This reimbursement may be requested if the aggregate amount actually paid by the Fund toward operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses. The Adviser is permitted to be reimbursed for management fee waivers and/or expense payments made in the prior three fiscal years. The Fund may make such repayments to the Adviser if such repayment does not cause the Fund's total expense ratio to exceed the expense cap at the time such amounts were waived or the Fund's current expense cap. Any such reimbursement will be reviewed by the Board of Trustees. The Fund must pay its current ordinary operating expenses before the Adviser is entitled to any reimbursement of management fees and/or expenses. This operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees.

Example

This Example is intended to help you compare the costs of investing in the Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year, and that the Fund's operating expenses remain the same and the Fund's expense limitation agreement remains in force through March 31, 2020. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	One Year	Three Years	Five Years	Ten Years
Investor Class shares				
(if you redeem your shares)	\$128	\$404	\$ 700	\$1,543
(if you did not redeem your shares)	\$128	\$404	\$ 700	\$1,543

(if you did not redeem your shares)	\$ 86	\$272	\$475	\$1,059

Portfolio Turnover. The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may generate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 10.98% of the average value of its portfolio.

Principal Investment Strategies. To achieve its investment objective, the Fund will maintain approximately 25-30 companies in its portfolio and will invest in the common stocks of large capitalization (“large-cap”) U.S. companies. The Fund considers large-cap companies to be those publicly traded U.S. companies with capitalizations exceeding \$5 billion. For purposes of the Fund’s investment policies, the market capitalization of a company is based on its capitalization at the time the Fund purchases the company’s securities.

The Adviser selects the Fund’s investments by screening large-cap companies using the following eight criteria:

Required over entire holding period

- products or services that meet a clear economic need;
- strong competitive advantage (wide moats or barriers to entry);
- long history of profitability and strong metrics (net profit margin, return on equity and net income ratios);
- generates high levels of cash flow;
- available at a low price in relation to intrinsic value (the perception of value based on all factors of business, tangible and intangible);

Favored, but not required

- management’s history of shareholder friendliness (dividends, buybacks, earnings quality, reporting transparency, executive compensation and acquisition history);
- strong balance sheet; and
- strong management (directors and officers) ownership (preferably with recent purchases).

The Fund's portfolio is built around high quality companies whose businesses have strong competitive advantages that the Adviser believes can be sustained for the long term. Once securities are purchased, the Adviser maintains a responsive process that is designed to manage overall portfolio risk by protecting against a significant decline in value of a security. The Fund aims to be a low-turnover fund, and the expected holding period of a newly purchased security is a minimum of three to five years.

The Fund is classified as a non-diversified mutual fund. This means that the Fund may invest a relatively high percentage of its assets in a small number of issuers.

The Fund may invest a large percentage of its assets in a few sectors, including consumer discretionary (goods and services considered non-essential by consumers), consumer staples (goods and services considered essential by consumers), financials (financial services provided to retail and commercial customers), health care (medical services, goods and equipment) and telecommunications services (relating to telecom equipment, telecom services and wireless communication).

Principal Risks. Remember that in addition to possibly not achieving your investment goals, **you could lose money by investing in the Fund.** The principal risks of investing in the Fund are:

- *Management Risk.* The Adviser's investment strategies for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.
- *Non-Diversification Risk.* The Fund may invest a large percentage of its assets in securities issued by or representing a small number of issuers. As a result, the Fund's performance may depend on the performance of a small number of issuers.
- *General Market Risk.* The value of the Fund's shares will fluctuate based on the performance of the Fund's investments and other factors affecting the securities markets generally.
- *Equity Market Risk.* Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change.
- *Large-Cap Company Risk.* Larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in consumer tastes or innovative smaller competitors. Also, large-cap companies are sometimes unable to attain the high growth rates of successful, smaller companies, especially during extended periods of economic expansion. For purposes of the Fund's investment policies, the market capitalization of a company is based on its market capitalization at the time the Fund purchases the company's securities. Market capitalizations of companies change over time.
- *Value Style Risk.* Undervalued stocks may not realize their perceived value for extended periods of time or may never realize their perceived

value. Value stocks may respond differently to market and other developments than other types of stocks. Value-oriented funds will typically underperform when growth investing is in favor.

- **Sector Weightings Risk.** To the extent the Fund emphasizes, from time to time, investments in a particular sector, the Fund will be subject to a greater degree to the risks particular to that sector, including the sectors described below. Market conditions, interest rates, and economic, regulatory, or financial developments could significantly affect a single sector. If the Fund invests in only a few sectors, it will have more exposure to the price movements of those sectors.

Consumer Discretionary Sector Risk. Industries in the consumer discretionary sector, such as consumer durables, hotels, restaurants, media, retailing and automobiles, may be significantly impacted by the performance of the overall economy, interest rates, competition, consumer confidence and spending, and changes in demographics and consumer tastes.

Consumer Staples Sector Risk. Companies in the consumer staples sector may be affected by demographics and product trends, competitive pricing, food fads, marketing campaigns, environmental factors, changes in consumer demands, the performance of the overall domestic and global economy, interest rates, consumer confidence and spending, and changes in commodity prices. Consumer staples companies may be subject to government regulations that may affect the permissibility of using various food additives and production methods. Tobacco companies may be adversely affected by regulation, legislation and/or litigation.

Financials Sector Risk. The financials sector is subject to extensive government regulation, can be subject to relatively rapid change due to increasingly blurred distinctions between service segments, and can be significantly affected by the availability and cost of capital funds, changes in interest rates, the rate of corporate and consumer debt defaults, and price competition.

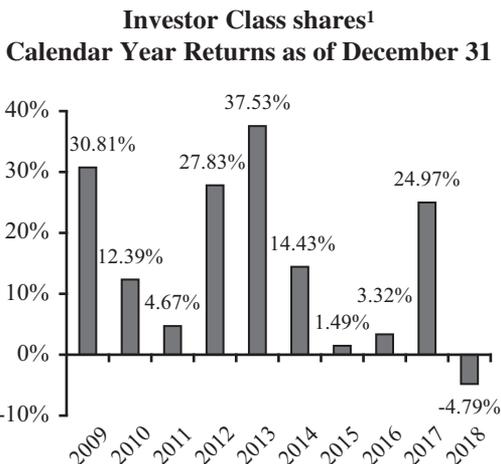

Health Care Sector Risk. Health care companies are strongly affected by worldwide scientific or technological developments. Their products may rapidly become obsolete. Many health care companies are also subject to significant government regulation and may be affected by changes in government policies.

Telecommunications Services Sector Risk. The telecommunication services sector is subject to government regulation and can be significantly affected by intense competition and technology changes, which may make the products and services of certain companies obsolete. The wireless telecommunication services industry can be significantly affected

by failure to obtain, or delays in obtaining, financing or regulatory approval, intense competition, product incompatibility, changing consumer preferences, rapid obsolescence, significant capital expenditures, and heavy debt burdens. The media and entertainment industry can be significantly affected by technological advances and government regulation.

Performance. The Fund previously operated as a series of Trust for Professional Managers (the “Predecessor Fund”). Before the Fund commenced operations, all of the assets and liabilities of the Predecessor Fund were transferred to the Fund in a reorganization (the “Reorganization”) on November 21, 2014. Accordingly, the performance shown in the bar chart and the performance tables for the periods prior to November 21, 2014 represent the performance of the Predecessor Fund. The Fund assumed the performance and accounting history of the Predecessor Fund prior to the date of the Reorganization.

The performance information demonstrates the risks of investing in the Fund by showing changes in the Fund’s performance from year to year and by showing how the Fund’s average annual returns for the one year, five year and since inception periods compare with those of a broad measure of market performance and the returns of an additional index of securities with characteristics similar to those that the Fund typically holds. Remember, past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available on the Fund’s website at <https://smeadcap.com/smead-value-fund/> or by calling the Fund toll-free at 877-807-4122.

¹ The annual returns shown in the bar chart are for Investor Class shares. The other classes of shares, net of any applicable sales charges, would have substantially similar annual returns to those of Investor Class shares because all of the classes of shares are invested in the same portfolio of securities, and the returns would differ only to the extent that the classes have different sales charges, distribution fees and/or service fees and expenses.

The calendar year-to-date return for the Investor Class shares of the Fund as of December 31, 2018 was -4.79%. During the period shown in the bar chart, the best performance for a quarter was 18.66% (for the quarter ended September 30, 2009) and the worst performance was -13.85% (for the quarter ended June 30, 2010).

Investor Class shares of the Fund commenced operations on January 2, 2008. Class I1 shares of the Fund commenced operations on December 18, 2009. Performance shown for Class I1 shares prior to its inception (Since Inception) reflects the performance of Investor Class shares, adjusted to reflect Class I1 expenses. Class A shares of the Fund commenced operations on January 27, 2014. Performance shown for Class A shares prior to its inception (Five Years and Since Inception) reflects the performance of Investor Class shares, adjusted to reflect Class A expenses. Class R1 shares, Class R2 shares and Class Y shares each commenced operations on November 25, 2014. Performance shown for Class R1 shares, Class R2 shares and Class Y shares prior to inception of each such share class (Five Years and Since Inception) reflects the performance of Investor Class shares, adjusted to reflect the expenses of Class R1 shares, Class R2 shares and Class Y shares, respectively.

After-tax returns are shown for Investor Class shares only and will vary for the other shares classes. After-tax returns are calculated using the historically

highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts ("IRA").

In certain instances, the Return After Taxes on Distributions and Sale of Fund Shares may be higher than other return figures because the sale of Fund shares gives rise to an assumed tax benefit that increases the after-tax return.

Tax Information. The Fund's distributions will be taxed as ordinary income or long-term capital gain, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an IRA. You may be taxed later upon withdrawal of monies from such tax-deferred arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries. If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create conflicts of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
